EDUCATION

B.Tech – Instrumentation & Control Engineering (ICE)	2024-2028	Netaji Subhas University of Technology (NSUT)	CGPA – 7.8
CBSE (Class XII)	2024	SD Public School	88.25%
CBSE (Class X)	2022	Venkateshwar Global School	95.5%

EXPERIENCE

1. **Operations & Finance Intern** **May 2026 – July 2026**
   Annapurna Plastic Industries, Delhi
   - Managed sales, inventory, and 300+ accounting records, surfacing purchasing and demand trends used by leadership to adjust monthly procurement decisions.
   - Streamlined GST invoicing and AR/AP tracking for 100+ transactions, reducing manual reconciliation time and improving day-to-day operational accuracy
   - Translated monthly sales and inventory data into actionable reports, identifying slow-moving stock and seasonal demand patterns that informed business decisions

2. **Industrial Training, R&D Intern, Wheel Speed Sensor Dept.** **June 2025 – July 2025**
   Continental Automotive India Pvt. Ltd., IMT Manesar
   - Partnered with engineering teams to test and validate 500+ Wheel Speed Sensors daily, identifying reliability gaps in the testing process for high-volume production
   - Recommended process improvements to testing protocols based on defect patterns observed across production runs.

VIRTUAL EXPERIENCE

1. **Mastercard Advisors & Consulting Services Virtual Experience (Forage)** **Aug 2026**
   - Designed an incrementality-based marketing test using Test & Learn methodology to measure true causal impact of promotional spend for a retail client
   - Identified a 22.3% average post-promotion sales decay and a 52-point performance gap between best- and worst-performing store-promotion pairs, and recommended reallocating promotional budget toward higher-performing store segments.

PROJECTS

1. **Credit Card Spend Analyzer & Rewards Optimizer** | *React, TypeScript, Node.js/Fast API, PostgreSQL, Chart.js*
   - Identified a gap in existing card comparison tools users couldn't see which card/category combo maximized rewards for their actual spend behavior and built a platform to solve it
   - Designed a recommendation model that translates raw transaction data into a single actionable insight ("use Card X for Category Y"), prioritizing clarity over exposing the full underlying analysis
2. **Meeting Overload Detector** | *React, TypeScript, Node.js, Google Calendar API*
   GitHub – https://github.com/AryanBansal2421/Meeting-Overload-Detector
   - Used weighted interval scheduling to rank reschedule suggestions, prioritizing high-impact changes over exhaustive optimization a deliberate trade-off to keep suggestions usable rather than overwhelming
3. **Multi-Agent GitHub PR Reviewer** | *Fast API, Gemini AI, GitHub API, Next.js, Tailwind CSS*
   GitHub– https://github.com/AryanBansal2421/pr-reviewer-backend
   Live Demo - https://pr-reviewer-frontend-five.vercel.app/
   - Scoped the review problem into three distinct domains (security, code quality, architecture) and assigned each to a specialized agent, rather than one general-purpose reviewer — a design decision that improved review specificity.

TECHNICAL SKILLS & INTERESTS

- **Languages:** C++, Python, SQL
- **Data Analytics & Business Tools**: Microsoft Excel, Busy Accounting Software (Busy Win), Pandas, NumPy
- **Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook

ACHIEVEMENTS & EXTRACURRICULARS

- Smart India Hackathon 2025 Finalists
- Flipkart grid 8.0 Semi-finalist
- Texas Instruments BYTE'26 Mentee
- LeetCode - https://leetcode.com/u/Aryan_B178/
