EDUCATION

Course	College / University	Time	CGPA/Percentage
B.Tech (ICE)	Netaji Subhash University of Technology	2028	7.8 (till Semester 4)
CBSE (Class XII)	SD Public School	2024	86.8%
CBSE (Class X)	Venkateshwar Global School	2022	94.8%

EXPERIENCE

Industrial Training, R&D Intern, Wheel Speed Sensor Dept. **June 25'**

Continental Automotive India Pvt. Ltd., IMT Manesar

- Assisted in manufacturing and final function testing of 500+ Wheel Speed Sensors (WSS) daily using PLC and LabVIEW-based setups.
- Supported quality checks, defect identification, and adherence to SOPs in a high-volume production environment.

PROJECTS

1. Multi-Agent GitHub PR Reviewer| FastAPI ,Gemini AI ,GitHub API ,Next.js ,Tailwind CSS

GitHub: https://github.com/AryanBansal2421/pr-reviewer-backend

Live Demo: https://pr-reviewer-frontend-five.vercel.app

- Engineered a multi-agent AI system using FastAPI and Gemini API where 3 specialized agents (Security, Code Quality, Architecture) run in parallel to automatically review GitHub Pull Requests.
- Implemented GitHub Webhook integration for real-time PR detection; agents post actionable line-by-line feedback directly on PRs within seconds of code push.
- Built async task pipeline using Python's concurrent.futures for parallel agent execution, reducing review time by 3x compared to sequential processing

2. Meeting Overload Detector| React, TypeScript, Node.js, Google Calendar API

GitHub: https://github.com/AryanBansal2421/Meeting-Overload-Detector

- Engineered a Meeting Overload Detector using React, TypeScript, and Node.js that ingests live Google Calendar data via OAuth 2.0 and flags users exceeding a configurable meeting-to-focus ratio threshold
- Applied weighted interval scheduling (greedy + min-heap priority queue) on real calendar events to maximise focus block detection and rank reschedule suggestions by window size
- Shipped end-to-end Google OAuth flow, REST API, heatmap visualisation, and Vercel/Render deployment with zero mock data

3. SIH Project: (SANGHA)| React.js, Next.js, Tailwind CSS, Next Auth, Tesseract OCR

- Built responsive React/Next.js interfaces for a gamified heritage-content platform, including geo-tagged media uploads, points/leaderboard views, and role-based workflows for contributors and reviewers.
- Designed reusable UI components and client-side states for upload, review, loading, error, and permission scenarios supporting concurrent submissions without confusing user feedback.
- Created an OCR preprocessing flow for historical manuscript images using grayscale conversion, thresholding, and noise reduction before sending images to Tesseract.

TECHNICAL SKILLS & INTERESTS

- **Languages**: C++, Python, JavaScript, Embedded C
- **Web:** React, Flask, Fast API, Supabase, REST APIs
- **ML/AI:** RAG, Sentence Transformers, OpenAI API, Pandas
- **Tools**: Git, GitHub, VS Code, Jupyter Notebook
- **CS Fundamentals:** Data Structures & Algorithms, OOPS, OS, Computer Networks, DBMS

ACHIEVEMENTS

- Smart India Hackathon 2025 Finalists
- Flipkart Grid 8.0 Semi-finalist
